Simplicity and Efficiency in X-ray imaging

FDR SE Lite Series

An outstanding technology

Equipped with Irradiated Side Sampling (ISS) technology, which positions its capture electronics (TFTs) at the irradiation side, in contrast to traditional detectors.

17×17 cassette removes unnecessary cassette handling

The 17×17 square shaped cassette allows improved workflow by removing the requirement of switching the cassette horizontally or vertically during the examination.

IPX4 waterproofing

Structured to prevent the infiltration of liquids, the device conforms to IPX4 and easy-to-clean flat shape. There is no need to worry that fluids such as blood or vomit could enter the device.

Speedy display of images greatly shortening examination time

Digital radiography requires no steps for imaging and provides imaging results instantly. The efficiency in exam cycle improves clinical outcomes such as shortened exam times and enhanced patient comfort.
